

Neither Cedric nor the twins knew anything about sailboats, but they still had a lot to say about them. They drew their ideas in the dust with sticks, and agreed that the boat was where you sat, and they would need a sail to catch the wind. But how could they hold the sail up in the air? 19

After much discussion, the three friends came up with a rough boat design. They would use two big leaves for the boat, one big leaf for the sail, and a stick to hold it up. They started hunting for leaves and sticks straight away, but it wasn't easy to find the right sort of leaves for the job. 20
